### DETAILED ACTION

1. This application has been examined. The amendment filed 11/16/07 has been entered.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 23 is rejected under 35 U.S.C. 102(e) as being anticipated by Moore et al (2005/0090937).
4. Regarding claim 23, Moore et al show a facility monitoring system comprising a computer including a non-volatile memory and a volatile memory (abstract), the computer configured to store a first, data set in the non-volatile memory, the first data. set having data collected from at least one sensor over a first time interval (para 4, 10, 13, 14), the computer further configured to store in the volatile memory a second data set having data collected from the at least one sensor over a second time interval after the first time interval (para 13, 14, 40, 42), the computer further configured to retrieve

Art Unit: 2174

the first data set from the non-volatile memory and the second data set from the volatile memory and to store the first and second data sets in either the volatile memory or a first memory (Figures 2, 3, para 4, 11).

5. Claims 1-2, 7-13, 18-20, 22-23 are allowable over the prior art of record. These claims bring in the database and request/retrieve details as well as the start and end time details, which all combined with the other features of the claims together are not set forth in the prior art of record.

6. Applicant's arguments filed have been fully considered but they are not persuasive. Applicant merely repeats claim 23 in the arguments and states that Moore et al do not show the features of the claim. However, as discussed above, Moore et al do in fact show these features. .

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2174

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
